OBJECTIVE: To obtain a senior web developer position where my skills can be best utilized.

SUMMARY OF QUALIFICATIONS:

15 years of full cycle experience in software engineering. Proficient in C#, ASP.Net, VB.NET, Entity Framework, Microsoft MVC, Bootstrap, SQL Server, TSQL, LINQ, Javascript/JQuery, HTML5, CSS3, and responsive sites. Excellent customer service and communication skills. Detail and deadline oriented with a multi-task emphasis. Work well independently and as part of a team. Flexible and reliable with a positive, can-do attitude at all times. Enthusiastic go-getter seeking and conquering tech challenges as a way of life.

“HOME” SKILLS:

- Microsoft full-stack ASP.Net C#, MVC5, Entity Framework, SQL Server 2012.
- Object oriented design with code re-use and testing strategies in mind.
- Bootstrap or JQueryUI / JQuery Mobile for front end interactivity; custom JavaScript/JQuery as needed.
- Heavy database designs and database-driven apps with an eye for reporting, optimization, and tracking.
- My approach; if something doesn't make sense I will hunt down the answers until they're found.
- My motto: great software is not great until it brings the company and its users a great benefit.

WORK EXPERIENCE:

1/2014 – Current **Contractor** **Miscellaneous Projects** Poway, CA

- Microsoft Visual Studio 2013 ASP.Net C#, MVC5, Entity Framework Code First, Azure cloud deployment.
- GStore CMS/ eCommerce framework on GitHub <http://www.github.com/renogmusic>
- Bootstrap Responsive sites and Bootstrap theme customizations with CSS and JQuery.
- Entity Framework Code First migrations and Fluent APIs for database configuration.
- SignalR real-time notifications and web-based chat/instant messaging.
- WebApi 2.0 REST services and client OWIN token security with Asp.Net Identity 2.0
- Working knowledge of SPA architecture, Angular.js client-side MVC framework, and Web Services.
- Microsoft Virtual Academy #3 Top Student in United States for October. Transcript available.

6/2012 – 1/2014 **Web Developer** **Anderson Direct Marketing** Poway, CA

- Rapid development of direct mail lead capture applications in C#, ASP.Net, SQL, EF 4.
- Responsive sites with Foundation.css and 12-column grid layouts hand-coded.
- Agile methodologies for rapid time to market and quality code reuse on the fly.
- Visual Studio 2010, 2013, Entity Framework 4/6.0, and Team Foundation Server source control.
- Designed and coded in-house Web Forms server controls and development tools, aka FLOCK.
- Gather requirements, generate functional specs, user flow, database schema, and wireframes.
- Google Analytics and reporting of lead statistics in automated report senders and reports.
- Integrate lead capture and fulfillment with Sales Force Web Service API in Client production systems.
- SQL Server databases and LINQ queries with Entity Framework database-first.

5/2002 – 6/2012 **Software Engineer** **Strategic Organizational Architecture** Ramona, CA

- 10 years of a major SaaS web application for 2-1-1 centers: WebInform.
- Hundreds of progressive enhancements to support live call center systems and changing requirements.
- Gathered requirements, interfaced with clients, architected, coded, deployed, and maintained application.
- Originally built site with Classic ASP / VB COM, and later migrated to VB.NET/ADO.NET.
- SQL Server design and optimization with tables, full-text search, indexed views, foreign keys, TSQL procedures, triggers, and queries; classic ADO, VB.NET, ASP.NET, ADO.NET
